How to Care for your Mounted Philodendron

- Light – Hang in a spot with bright, indirect light.
- Water – Water when the moss ball feels hard and dry, or before the leaves begin to curl. On average, water once a week (mounted plants tend to dry out faster than potted plants, so keep an eye on the condition of the leaves for signs your plant is thirsty)
- How to Water – Place the moss ball under a slow, running tap
- Allow it to fully absorb water for 8 – 10 minutes. Remove and hold vertically so excess water can drip off completely. Rehang only after dripping stops

If you have any questions, feel free to message us on Etsy or Instagram! Thank you so much for purchasing from our store!

We're always happy to help and want you to truly enjoy your plant!
